## **DETAILED ACTION**

### **Election/Restrictions**

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

- Group I, claim(s) 19-20, drawn to a method for cleaning.
- Group II, claim(s) 21-36, drawn to an intermediate printing device.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The printing device of Group II requires an intermediate impression cylinder and a rotating body mounted in a particular location that is not required by Group I. Additionally, Group I requires the paper web be printed by a squeegee running over it which is structure that is not required in Group II. Therefore, the inventions of Group I and II lack a corresponding special technical feature and therefore do not relate to a single general inventive concept under PCT Rule 13.1.

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
